PROFESSIONAL SUMMARY

Software Engineering student at FAST NUCES with hands-on experience in full-stack web development, software quality assurance, test automation, and Salesforce development. Proficient in React.js, Node.js, Express.js, JavaScript, MongoDB, Playwright, Python, Salesforce, CRM, and modern web technologies. Experienced in developing responsive web applications, implementing REST APIs, automating end-to-end testing, validating critical user flows, and building scalable software solutions. Strong problem-solving, debugging, testing, and collaboration skills with a focus on delivering reliable and user-centric applications.

PROFESSIONAL EXPERIENCE

Salesforce Developer | Adforce Solutions

Aug 2026 – Present

- Developing and configuring Salesforce solutions to support customer relationship management (CRM) workflows and business requirements.
- Utilizing Salesforce Trailhead to strengthen knowledge of Salesforce development, administration, data management, and CRM concepts.

Software Quality Tester Intern | NETSOL Technologies

Jul 2026 – Aug 2026

- Automated 50+ end-to-end test cases using Playwright and Python, reducing repetitive manual testing effort by 40%.
- Validated critical user flows through end-to-end testing and smoke testing to identify functional issues and regression risks.

Web Developer Intern | Quantum Logics

Apr 2026 – Jul 2026

- Collaborated with cross-functional teams to develop and maintain web applications.
- Gained practical exposure to frontend and backend development practices.

Front-End Developer Intern | DeveloperHUB Corporation

Nov 2025 – Dec 2025

- Optimized a modular, responsive eCommerce interface using React, Vite, and Tailwind CSS, including homepage, hero banners, and product category sections.
- Architected dynamic product listing and product detail pages with grid/list views and cart functionality.
- Implemented client-side navigation using React Router across Home, Products, Product Details, and Cart.

Frontend Developer Intern | Elevvo Pathways

Sep 2025 – Oct 2025

- Architected 5+ responsive frontend components including sidebar, contact form, landing page, task application, and blog components.
- Developed reusable interfaces using HTML, CSS, JavaScript, and React.js with a focus on responsive UI design.
- Engineered clean, reusable components and improved page load performance by 15%.

EDUCATION

Bachelor's in Software Engineering (BS-SE) <i>FAST NUCES Lahore</i>	2023 - Present
Intermediate (ICS) <i>Government College University (GCU)</i>	2021 – 2023
Matriculation (Science Group) <i>Central Model School Lahore</i>	2019 – 2021

PROJECTS

BoolForge - DLD Playground | JavaScript, React.js, MERN

- Developed an interactive digital-logic learning and circuit-design platform featuring a visual circuit builder, K-Map simplification, and number-system conversion tools.
- Designed interactive learning functionality to help users visualize and work with digital-logic circuits and mathematical representations.

AutoSphere | React.js, Express.js, Node.js, MongoDB

- Developed a full-stack MERN e-commerce platform for vehicle parts with role-based access for Buyers and Vendors.
- Implemented functionality for users to discover products while enabling vendors to showcase and manage inventory on a scalable platform.

Mini-LinkedIn | React.js, Appwrite, Redux Toolkit, Tailwind CSS

- Developed a social networking web application with secure user authentication, dynamic profile management, and full CRUD functionality for user-generated posts.
- Implemented responsive user interfaces and application state management using modern React-based technologies.

ResQ | React.js, Express.js, Node.js, MongoDB

- Developed a full-stack disaster relief management platform connecting victims, volunteers, donors, and administrators for coordinated disaster response.
- Implemented real-time location tracking and analytics to support efficient disaster-response coordination.

TECHNICAL SKILLS

Languages: C/C++, Java, JavaScript, SQL, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, Firebase, Appwrite, Microsoft SQL Server

Software Testing: Playwright, Python, End-to-End Testing, Regression Testing

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Postman, Cursor
